	()		•				

¹⁾ Calf crop is defined as the actual number of calves sold divided, by the total number of cows (assuming all cows were exposed).

²⁾ Prices represent 2014 price projections from Cattle Fax, Doanes reports for New Mexico feeder cattle cash prices.

³⁾ Market prices include commissions, brand inspections, beef council, yardage, feed, and insurance

⁴⁾ Annual capital recovery is the method of calculating depreciation and interest recommended by the National Task Force on Commodity Costs and Returns Measurement Methods.

⁵⁾ The 35% reduction in asset values which represent a mix of new and used machinery.
6) Interest on average investment.
